Page 7, line 26: NEW Finding of Fact, paragraph #34:

"Staff has also presented a series of other scenarios under which the bank balance could be reduced. Under option 9, the surcharge would be reduced through implementation of a \$0.15 per therm surcharge from November 2005 through April 2006 and raising the surcharge to \$0.30 per therm from May 2006 through October 2006. We find that this surcharge structure is more likely to help mitigate the impacts of the surcharge increase on customers, as it would implement a higher increase in the summer months, rather than the winter, when most consumers are most reliant on natural gas to heat their homes."

Make all conforming changes.
